PROFESSIONAL SUMMARY

Civil/Structural Engineer with 3+ years of experience in structural analysis, design, and construction documentation for buildings and infrastructure projects. Experienced in reinforced concrete and steel design, foundation engineering, transmission and substation structures, bridges, and slope protection works. Proficient in STAAD.Pro and Autodesk Revit for structural analysis, BIM modeling, reinforcement detailing, and preparation of construction drawings. Skilled in evaluating structural loads, reviewing engineering designs, and coordinating with multidisciplinary teams. Knowledgeable in NSCP, ACI 318, AISC, ASCE 7, and AASHTO LRFD standards, with a focus on producing safe, practical, and code-compliant structural designs.

WORK EXPERIENCE

Structural Engineer | Rembox - Freelance
August *2026 – Present*

- Prepare detailed structural drawings, foundation plans, framing layouts, sections, and construction details in accordance with project specifications.
- Develop and maintain structural BIM models in Revit, including foundations, columns, beams, slabs, and reinforcement detailing.
- Produce structural reinforcement drawings, rebar schedules, and material schedules to support accurate construction documentation.
- Review structural drawings, BIM models, and engineering documentation to ensure dimensional accuracy, consistency, and compliance with project standards.
- Provide technical support in resolving structural modeling, reinforcement detailing, and documentation issues.
- Participate in technical discussions and project coordination to address design revisions and ensure timely submission of deliverables.

Structural Engineer | Kyong-Ho Engineering & Architects Co., Ltd.
May *2026 – Present*

- Performed dike slope stability for approximately 27.64 km river improvement using GEO5 and PLAXIS, developing design recommendations to support structural stability.
- Performed manual calculations for embankment sheet piles to support the overall slope stability assessment of flood control dikes.
- Assisted in quantity takeoff for bridges and related infrastructure, providing accurate quantities to support cost estimation and budgeting.
- Prepared detailed engineering design of flood control infrastructure and bridges using AutoCAD, ensuring accurate representation of structural elements for river improvement works.
- Assisted in road profile and cross-section alignments in Civil 3D, supporting accurate grading and construction-ready of preliminary road design.

Civil Design Engineer | SNPDRI Philippines Corporation
2025 – 2026

- Performed structural design analysis for infrastructure projects to reduce design issues during review.
- Conducted soil investigations and geotechnical site assessments to support suitable foundation design and reduce settlement risks.
- Developed detailed engineering structural designs for transmission and substation, applying precise drafting standards to deliver high-quality, construction-ready plan drawings.
- Coordinated design updates across engineering teams, keeping drawing versions aligned to avoid costly rework.
- Prepared Bill of Quantities (BOQs) to provide accurate cost estimates and support bidding and procurement.

Structural Engineer | Hefty Power System Corporation
2023 – 2025

- Performed grouted mansory rockwall design for slope protection using GEO5 and manual calculations in Excel, evaluating slope stability criteria to ensure structural compliance with stability standards.
- Designed tubular and lattice towers for transmission and substation projects using STAAD, developing structural design recommendations based on load and stability requirements, delivering construction-ready designs.
- Reviewed shop drawings and identified design issues, resolving discrepancies before fabrication to prevent costly errors and rework.
- Assisted in BOQs using PlanSwift and Bluebeam, and costs estimates accurately to support on-time and competitive bid submissions.

TOOLS & TECHNICAL SKILLS

- **Structural Design:** AutoCAD, Revit, Civil3D, STAAD.Pro, STAAD Foundation, RAM, IdeaStatica, RCDC, ETABS, SpColumn, Excel Spreadsheet
- **Slope Stability**: Geo5, GeoStudio, and Plaxis
- **Estimation:** Planswift, Bluebeam
- **Codes:** NSCP, ACI, AISC, ASCE 7, UBC, ASTM, AASHTO, DGCS, BSDS

CERTIFICATES & TRAININGS

- Autodesk Certified Professional in Revit for Structural Design (2026)
- Drawdown and Stability Analysis of Earth Dams Using GeoStudio and PLAXIS (2026)
- Structural Analysis and Design of Special Structure III: Steel Elevated Water Tank using STAAD.PRO and IDEA STATICA (2024)
- Empowering Structural Engineering: Cutting-Edge Software Solutions for Modern Challenges (2024)
- Steel Connection Design Training using STAAD.Pro (2024)
- 2024 PICE Midyear Convention and Technical Conference (2024)
- Finite Element Analysis Theory and Application using STAAD.Pro and RAM Connection (2023)
- Geo5 Basic Training (2023)
- Structural Design 101: A Structural Detailing of RC Structures in Low to Mid-Rise (2022)

EDUCATION & LICENSURE

- **Bachelor of Science in Civil Engineering, Major in Structural Engineering** *2018 – 2022*
  Technological Institute of the Philippines
- **Licensed Civil Engineer** *November 2022*
  Professional Regulation Commission (PRC)
